

LIVENGOOD FEEDS  
IS PROUD TO INTRODUCE  
**THE TEXAS WILDLIFE  
NUTRITION GROUP.**

THIS NEW DIVISION OF  
LIVENGOOD FEEDS  
ACCENTUATES OUR  
PROACTIVE COMMITMENT  
TO THE TEXAS DEER  
INDUSTRY.

**The concept is simple.** It starts with a commitment from every Livengood employee to develop the kind of feed products you need and the service you deserve. From pellet quality and nutritional density, to prompt dependable delivery, we are very serious about making deer feed.

**Backing up this commitment** is a group of experienced professionals with the skills required to provide you with a sound nutritional program along with open, helpful service. These folks are responsible for your satisfaction and are accountable for getting you the product you want, every time.

**The stated goal of the Texas Wildlife Nutrition Group** is to be the new standard for deer nutrition in Texas. We will achieve this goal through the performance of our people and the quality of our products.

**Texas Wildlife Nutrition Group** is focused on providing the most accurate nutrition for all classes and species of wild game. Understanding that many other factors affect managing a deer herd helps us make products that are appropriate to the industry. By working with you, listening to your goals and understanding your unique requirements, we can fit you with a nutrition program that maximizes your feed dollars.

## **Texas Wildlife Nutrition Group Offers:**

- **Consistency-** Consistent products that perform
- **Help-** Nutritional consultations
- **Reliability-** Accountability from our people
- **Quality products-** Nutrition programs designed to maximize your feed dollars
- **Assurance-** Dependability from the order to the delivery
- **Answers-** Objective, open communication
- **Uniqueness-** Texas Wildlife Nutrition Group strictly focuses on the wildlife industry

## TEXAS WILDLIFE NUTRITION FEEDS:

### OUTSIDE RATIONS

#### **TWN 16 903 & TWN 20 904**

Multi-use feeds for deer and exotics. Increases horn size and conditioning in a cost effective manner.

#### **MEGA-RAK 937**

This ration is designed to optimize the performance of your deer herd. High quality multiple proteins are used to optimize both rumen degradable and bypass requirements. Blended fat sources provide a high level of energy and are combined with high quality digestible fiber sources. Rumen buffers and Vitamin B complex are added to stimulate appetite and increase utilization of feedstuffs.

#### **PROTEIN PLUS 24 938**

A high protein blend for free ranging deer. Recommended during periods of lower intake due to lush growing conditions in order to maintain higher protein levels in the diet. Contains added buffers for healthy rumen development.

#### **SUPER PREMIUM 20 939**

Recommended for consistent peak performance when ultimate antler growth progression is desired. Contains 4% fat to meet the extra energy demands of antler development, gestation and lactation. Select proteins provide proper amino acid balance and are combined with high quality digestible fiber sources. Added buffers and yeast are added for healthy rumen activity.

#### **POST RUT REBOUND 940**

For deer recovering from high stress and the rut period. Contains additional levels of carbohydrates and blended fats for quick weight gains. Buffers, antioxidants and Vitamin B complex are added for greater appetite, proper rumen function and immune recovery.

### PEN RATIONS

#### **TEXAS COMPLETE BREEDER 920**

Specifically developed for deer in confinement and recommended for all programs. Highly palatable ration fortified with multiple protein and digestible fiber sources. Promotes healthy rumen development and condition. Contains added yeast.

#### **TEXAS PRIME PEN RATION 918**

Feed to male and female deer in confinement. Provides deer owners who value their investment in genetics, the opportunity for consistent optimum performance. Also designed to enhance development of bucks and produce improved milk flow in lactating does.

#### **MAX-UM GROWER RATION 919**

A highly palatable complete ration designed to be fed to fawns and young deer up to one year of age. Promotes healthy rumen development, efficiency, bone structure and weight gains.

#### **PEN-A-CLE 18% Deer Breeder Textured 921**

A high fat supplemental textured feed to be fed in combination with an existing pellet program. Well suited for males during antler growing season and lactating females after fawning.

**FOR AN EVALUATION OF YOUR CURRENT NUTRITION PROGRAM** or for access to professional guidance and development when initiating your own feed plan, the Texas Wildlife Nutrition Group is here for you. Please, feel free to contact us with any questions. We look forward to working with you and your business.
